# Penjelasan Fitur Halaman Isi (Bahasa Inggris)

The screenshot shows an educational software interface with the following components and callouts:

- Lesson Title:** Points to the main title "Eye disorder and disease" at the top of the content area.
- Lesson Guide:** Points to a sidebar window titled "Guide" containing instructions like "Read the information about eye diseases and disorder" and "Finish the activity in section II".
- Section Navigation:** Points to circular icons labeled 'a' and 'b' in the top right corner.
- Animation/Simulation Content:** Points to a diagram of an eye showing light rays from a "Distance Object" being focused "in front of retina" by a "concave lens".
- Text Content:** Points to a text box describing myopia: "Myopia or nearsighted is an eye disorder wherein objects nearby appear clear to the eyes and distant objects appear blurred. In a myopic eye, the distance between the lens and the retina is too long, so the image of objects at a distance is focused in front of the retina. Myopic eyes can be helped by using concave lens."
- Simulation Content:** Points to a list of interactive options: "Myopia", "Hypermetropia", "Presbyopia", "Astigmatism", "Snellen chart", "LASIK", and "Eye vision".
- Text Content:** Points to the text area of the LASIK procedure window.
- Pop-up Window:** Points to the "Snellen chart" window showing a portrait of a man.
- Animation Content:** Points to the "Eye Vision" window showing two images of a cat labeled "Normal" and "Astigmatism".
- Text Content:** Points to the "LASIK" window, which includes sections for "Description", "Benefit", "Requirements", "Procedure", and "Risk", accompanied by diagrams of the eye during surgery.

The image shows a screenshot of a web application titled "Kontrol dan Koordinasi" (Control and Coordination) under the category "Alat Indra" (Senses). The main content area is titled "Penyakit mata dan kelainan mata" (Eye diseases and eye abnormalities). It features a navigation bar with "Kelainan" (Abnormalities) and "Penyakit" (Diseases) tabs. A central diagram illustrates the eye's structure and how light rays focus on the retina, with labels for "Objek jauh" (Distant object), "Dengan lensa cekung" (With concave lens), and "Terfokus tepat di retina" (Focused exactly on the retina). Below the diagram is a text box explaining myopia (Miopia) and its treatment with concave lenses. To the left, a "Panduan" (Guide) sidebar lists topics like "Beratlah informasi mengenai penyakit dan kelainan mata..." and "Kerjakan latihan soal pada bagian B". At the bottom, three pop-up windows are shown: "Snellen chart" with a portrait of a man, "Penglihatan Mata" (Eye Vision) comparing a normal cat and a diabetic cat, and "LASIK" with a video of the procedure and descriptive text.

**Judul Materi** (Subject Title): Penyakit mata dan kelainan mata

**Panduan Materi** (Material Guide): Beratlah informasi mengenai penyakit dan kelainan mata... Kerjakan latihan soal pada bagian B.

**Navigasi Bagian** (Section Navigation): a, b

**Materi Animasi/Simulasi** (Animation/Simulation): Diagram of the eye showing light rays focusing on the retina.

**Materi Text** (Text Material): Miopia atau rabun jauh adalah kelainan mata adalah kelainan mata ketika mata dapat melihat objek dekat dengan jelas sementara objek jauh tampak buram. Pada mata miopia, jarak antara lensa dan retina terlalu jauh sehingga bayangan dari objek jauh terfokus di depan retina. Mata miopia dapat dibantu dengan lensa cekung.

**Pop-up Window** (Pop-up Window): Snellen chart, LASIK, Penglihatan mata

**Materi Animasi** (Animation): Snellen chart

**Materi Simulasi** (Simulation): Penglihatan Mata

**Materi Text** (Text Material): LASIK
